

Princesse Grace Hospital

Monaco

Michel Hery

Association de Radiothérapie et d'Oncologie de la Méditerranée

Specific situation

- Population: 33 000 citizen
- Area: 2 km²
- Surrounding population: 100000 citizen

Epidemiologic specific problem

No statistical data are available for many reasons:

- + For local residents : Miscellaneous nationalities
- + For non residents : Most of treated patients
(French and Italian)

Positive values

Strong competences in medicine and surgery with large technical assessments :

Surgery:

- Thorax and abdomen
- Urology
- Gynaecology
- Head and Neck

In medical oncology,

- Conventional department with 25 beds with one for grafts (solid tumors and malignant hemopathies)
- 6000 ambulatory cares per year
- Lung cancer
- Palliative structure with home-care

Radiotherapy

Helicoidal CT-scan with a 80-cm diameter

Linac

Multi-leaves collimator with portal imaging
X6 and 25 MV

Association de Radiothérapie et d'Oncologie de la Méditerranée

Imaging

- 2 CT-Scan + 1 dedicated to biopsy or radiofrequency
- 1 MRI
- Nuclear Medicine department: PET-CT and scintigraphy

Development axes

Geronto-oncology

Digestive and urological oncology

Breast cancers

Association de Radiothérapie et d'Oncologie de la Méditerranée

Conclusion

Great technical devices with a clever strategy

Medical and Radiation Oncology are very closed:

- Meeting every two years: “biennale monégasque d'oncologie”
- “Monaco age oncologie” MAO
